

BANK CLEARINGS MAKE ANOTHER BIG INCREASE

Total Volume of Business for Week
Is \$12,248,169 Larger Than
Last Year.

RESERVE BANK STATEMENTS

Total Amount of Bills Discounted
and Bought During Past Week, \$5-
\$21,000—Consolidated Statement
for All Twelve Banks in System.

Bank clearings for the week ending yesterday aggregated \$32,692,241, which is an increase of \$12,248,169 over the corresponding week in 1916. For the past three or four weeks the bank clearings for Richmond have shown substantial increases and the local financial institutions have been kept exceedingly busy. The clearings for yesterday, a short business day, totaled \$4,664,241.

Bills discounted and bought by the local Federal reserve bank amounted to \$5,821,000 for the week ending Friday, October 12, according to the statement issued yesterday by Governor George J. Seay.

The following statement shows the condition of the local reserve bank:

Gold coin and certificates
in vault \$ 6,323,000
Gold settlement fund 25,920,000
Gold with foreign agencies 1,835,000
Gold with Federal reserve
agent 22,633,000
Gold redemption fund 746,000

Total gold reserve \$ 57,460,000
Legal tender notes, silver
certificates and subsidiary
coin 143,000

Total reserve \$ 57,603,000
Bills discounted and bought 17,915,000
United States government
certificates 4,125,000

Total earning assets \$ 22,040,000

Uncollected items 16,400,000

National bank notes 43,000

Due from depositories
of certificates of indebt-
edness September 26 5,017,000

All other resources 198,000

Total resources \$101,301,000

Liabilities \$ 4,477,000

Government deposits (in-
cluding L. L. payments,
except amounts redeposit-
ed) 309,000

U. S. Treasury special re-
count sale of certificates
of indebtedness Septem-
ber 26 5,017,000

Due to member banks re-
serve accounts 40,107,000

Due to other Federal re-
serve banks 455,000

Collection items 18,952,000

Federal reserve notes in ac-
tual circulation 37,636,000

All other liabilities 347,000

Total liabilities \$101,301,000

Gold reserve against net deposit li-
ability, 75 per cent.

Gold reserve against Federal reserve
notes in actual circulation, 75 per cent.

Federal Reserve Notes.

Issued \$38,871,000

On hand 1,235,000

Outstanding \$37,636,000

Total amount of bills discounted and
bought for the week ending October
12, 1917, \$5,821,000.

CONSOLIDATED STATEMENT FOR ALL TWELVE BANKS

WASHINGTON, October 13.—The
rush of trust companies and State
banks to join the Federal reserve sys-
tem increased resources of Federal re-
serve banks more than \$117,000,000 dur-
ing the past week, ending the total to
a new high record of \$2,417,845,000. The
condition of the reserve banks Octo-
ber 12, was as follows:

Resources.

Gold coin and certificates

in vault \$ 482,716,000

Gold settlement fund 321,778,000

Gold with foreign agencies 52,500,000

Total gold held by
banks \$56,994,000

Gold with Federal reserve
agents 580,734,000

Gold redemption fund 9,717,000

Total gold reserve \$1,447,445,000

Legal tender notes, sil-
ver, etc. 48,112,000

Total reserves \$1,495,557,000

Bills discounted—mem-
bers 293,164,000

Bills bought in open mar-
ket 185,775,000

Total bills on hand 478,939,000

United States government
long-term securities 54,878,000

United States government
short term securities 48,517,000

Municipal warrants 101,000

Total earning assets \$82,432,000

Due from other Federal
reserve banks—net 17,147,000

Uncollected items 321,202,000

Total deductions from
gross deposits 338,352,000

Five per cent redemption
fund against Federal re-
serve bank notes 500,000

All other resources 1,000,000

Total resources \$2,417,845,000

Liabilities.

Capital paid in 61,104,000

Government deposits 74,167,000

Due to members—reserve
account 1,255,309,000

Due to nonmember banks
—clearing account 51,377,000

Collection items 173,825,000

Total gross deposits \$1,584,678,000

Federal reserve notes in
actual circulation 779,835,000

Federal reserve bank notes
in circulation—net li-
ability 8,000,000

All other liabilities, includ-
ing foreign government
credits 4,178,000

Total liabilities \$2,417,845,000

Gold reserve against net deposit li-
abilities, 65.4 per cent.

Gold and lawful money reserve
against net deposit liabilities, 75.7 per
cent.

Gold reserve against Federal reserve
notes in actual circulation, 75.7 per
cent.

Copper Mines on State Line.

VIRGINIA, V. A., October 13.—The
copper mines on both sides of the Vir-
ginia-Carolina line at this place are to
be operated by the new Piedmont Cop-
per Mining Corporation which has been
chartered here, an authorized capital-
ization of \$200,000. Richard B.
Washington of Alexandria, is the
president of the new company, and
G. W. Lewis of the same city, is the
secretary. It is understood that Alex-
andria, Washington and Baltimore
capital is interested in this enterprise.

MEETING THE EMERGENCY NEED OF THE GOVERNMENT

Manufacturers of Enamelled Ware Call
to the Rescue and Save Far

Have Answered.

NEW YORK, October 13.—Owing to
the emergency needs of the govern-

ment, American manufacturers of
enameled ware have recently been
making record shipments of these
wares it became known to-day.

With the mobilization of the troops,
the medical division of the government
found itself in immediate need of large
supplies of hospital equipment. There
was a particularly pressing need of
enameled utensils. This ware which is

durable and easy to keep clean and
sterile, is an almost priceless part of
hospital equipment. Thousands of
pieces of the ware were immediately
required, and American manufacturers
were appealed to generally to meet
the situation.

The agents of the government ap-
pealed to the manufacturers to mobi-
lize their resources in any way that

would hasten production.
These suggestions were promptly
adopted with the result that the medi-
cal division has been supplied with
enormous quantities of enamel uten-
sils with practically no delay. As the
enameling industry is widely dis-
tributed geographically, it was possible
to so apportion many of the orders
that they fell to the lot of plants

which were located in the immediate
vicinity of certain of the cantonments.
In this way long-haul shipments were
eliminated, and considerable saving ef-
fects in time and shipping expense.

As a result of this plan of friendly
co-operation among all the interests
concerned, it was possible to break all
records in the production and ship-
ment of enameled ware, and to carry

on this emergency work without seri-
ously interfering with the normal
operations of the industry in question.

Most of the requisitions have already
been filled, and the government au-
thorities have expressed themselves as
highly pleased with the results, and it
is understood that even heavier pur-
chases are still to come.

WE HAVE MOVED

THE UNITED DOCTORS who, for the past several years, have met with remarkable SUCCESS in the TREAT-
MENT OF CHRONIC DISEASES have moved in their own building, **UNITED HOSPITAL** COR-
NER 10TH AND CLAY STREETS, where they will continue their OFFICE
PRACTICE as heretofore, from 9 A. M. to 8 P. M. daily, 10 to 1:30 P. M. Sunday.

THIS INSTITUTION is the outgrowth of our con-
stantly enlarging practice. The same IMPROVED
METHODS WILL BE OBSERVED. NO AD-
VANCE IN OUR FORMER CHARGES FOR
TREATMENT.

This institution is operated by an able
STAFF OF PHYSICIANS, who have devoted
many years of study and SPECIALIZING IN
CHRONIC DISEASES, among which are

The design of this institution is primarily for the
treatment of such cases as are NOT CONFINED
TO BED. Out-of-town patients can be accommo-
dated and remain at the hospital department only
when absolutely necessary.

The Dreadful Disease of Catarrh

In the treatment of this uni-
versal disease, which effects the
entire system, often causing deaf-
ness in prolonged cases, by dis-
turbance of digestion, and predis-
poses to bronchial and pulmonary
troubles. Under processes of
elimination and treatment with
special nuclein solutions, these
cases are greatly benefited.

In Chronic and Aggravated
cases we have obtained good re-
sults by using the combined Bac-
terines (Van Cott).

Rheumatism
Nervous Diseases
Skin
Dropsy
Piles
Fissures
Rupture
Paralysis

Stomach
Liver, Kidney
Goitre
Catarrh
Asthma
Eczema
Lumbago and
Blood Diseases

Treatment of Goitre

Goitre is treated at this insti-
tution with almost unvarying
success by the extracts from the
ductless glands, iodine locally
and by calaphoresis, and the
painless use of the electric cur-
rents.

ELECTRICAL TREATMENT

Produces remarkable results in many diseases. While elec-
tricity has been used in medicine for over a century, greater
results have been obtained since the discovery of TELSA
AND D'ARSONVAL in Diagnosis and Treatment.

WASSERMAN REACTION AND COMPLEMENT FIXATION TESTS.

Newest Approved Serums and Vaccines adminis-
tered by a specialist.

Kidney

The two principal diseases, and both dangerous, are
Brights and Diabetes. For proper diatetic treatment in
these diseases the correct diagnosis of the condition is
necessary. Serious results may be averted in early stages
in this manner. In this way a patient may be saved from
serious heart trouble, distressing dropsy and loss of eye
sight.

Diabetes treated by the "ALLEN METHOD," in addi-
tion to the well-known and accepted treatment by re-
stricted and selected diet, has been demonstrated that
an adoption of the "ALLEN METHOD," within a short
period removes the traces of sugar, relieves the distress-
ing thirst and permits the patient to live on almost an
unrestricted diet. This method has been adopted in our
institution.

Treatment of the Different Forms of Dyspepsia

ordinarily called stomach trou-
ble.

Dyspepsia as usually spoken of
is used to represent morbid dig-
estion in stomach proper, and
the altogether different condition
in the small intestines the fur-
ther condition of delayed poison
within the large intestines. The
diatetic, medicinal and mechan-
ical management of these cases
are entirely different from each
other. Our success in the treat-
ment of these different forms of
diseases, under the same name, is
due to our DIAGNOSIS.

Electricity for Paralysis

We do not pretend to
cure certain forms of pa-
ralysis, but in many in-
stances where the disease
depends upon functional
causes we find the remedy
in the judicious use of our
improved system of elec-
trical application.

Dropsies

The formerly hopeless
cases of dropsy from heart,
kidney and liver causes
have, on the improved
scientific methods, in many
instances produced satis-
factory results by our treat-
ment in most obstinate
cases.

Nervous Diseases

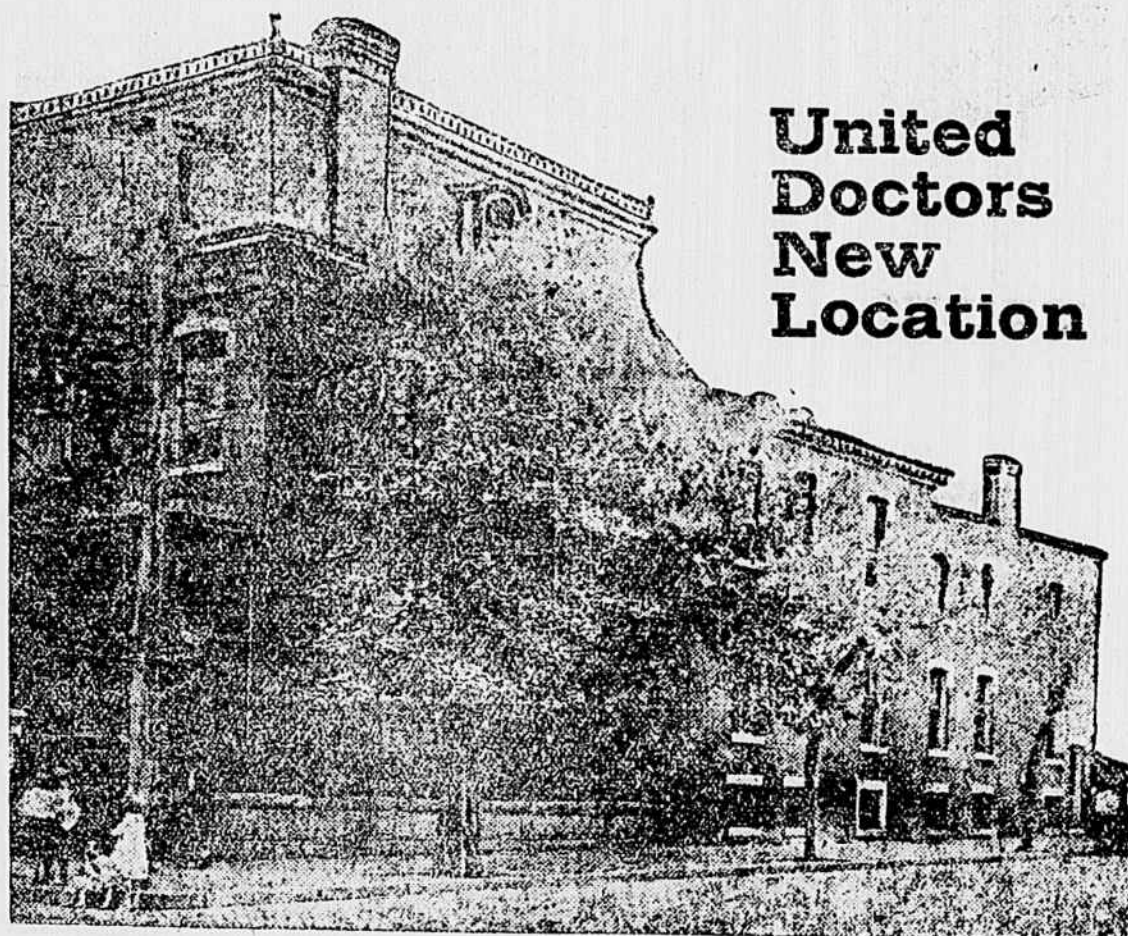

In such Chronic Nervous dis-
eases as Neuritis, Neurasthenia,
neuralgia, sciatica, local and gen-
eral Paralysis, we use every
Electrical Modality that has any
proven merit—Galvanic, Faradic
Static High Frequency, Sinusoid-
al, etc., along with the Nucleins
and other vitalizing agents.

Diseases of Old Age

One of the most serious and distressing ailments is found
in middle and old age men. Until recently constant suf-
fering and the daily use of an instrument has been the fate
of these unfortunates, or desperate surgical measures have
been resorted to with uncertain results upon men of ad-
vanced age and lowered vitality. UNDER THE PER-
FECTED ELECTRICAL TECHNIQUE IN THE HANDS OF
OUR SPECIALIST MOST REMARKABLE RESULTS HAVE
BEEN ATTAINED.

The Principles
Advocated by the
Leading Institutions
Are Applied by Our
Group Medicine
System

It has been advocated by a number of the medical pro-
fession at the different conventions that practicing medi-
cine in groups—that is, a number of physicians each
specializing in their various branches—far better results
are obtained in making DIAGNOSIS, as in this manner
the patient derives the benefit of the combined knowl-
edge of a number of experts at the same time. THIS IS
THE METHOD APPLIED AT THIS INSTITUTION.

Rheumatism, Arthretis, Lumbago and Asthma

These having many excitants
in common are traced to their
causes through clinical and labo-
ratory methods, which usually
enable us to afford speedy relief.
In addition to the usual reme-
dies for combating acids, we also
bring to our aid, the valuable
agents of Hot Air Medicated
Massage and High Frequency
Currents of Electricity.

Piles, Fissures and Other Rectal Diseases By Bloodless and Painless Method

All of the above-named
diseases furnish the very
best yielding cases for our
ELECTRICAL ABSORP-
TION METHODS, which
are BLOODLESS and
PAINLESS, and the NEW
BISMUTH PASTE METH-
ODS so successfully prac-
ticed in LONDON HOSPI-
TALS for FISTULAS is
used with gratifying re-
sults at this institution.

Blood and Skin Diseases

Under the above head
these obscure troubles that
baffle the physician are
diagnosed by BACTER-
IOLOGICAL EXAMI-
NATIONS made in our
own LABORATORIES,
and the appropriate AP-
PROVED SPECIFIC REM-
EDIES USED.
